Petition

Signed by the residents of the Alexandra & Ainsworth Estate

We oppose Camden's plan to install the distribution pipework described in planning applications **2023/5338/P : 2023/5339/P : ~~2024/0286/L : 2024/0091/L~~**

This pipework would be part of a new heating and hot water system **which we have not been consulted on,** which we do not want. These applications don't fit in with Camden's Environment Policies. These applications will have a detrimental affect on the Grade II* listed status it holds. We don't want water from big storage tanks housed in the garages.

The pipework is all external and would seriously damage the look of our homes.

The proposal relies on the boilers which regularly fail, create high energy bills and are not sustainable.

We would like to work with Camden for a greener non-gas-powered alternative system that will operate problem-free for the next 30+ years.
