Dear all

I've just spoken to on the phone. The photo below (time 14.06) is actually of the first floor rear room.

So we're all working off the same information I've updated the table I sent out last week to show what should be installed in each room.

Room	Your proposal	Our records	Comment
G Front			Agreed.
GF Rear			The proportions seem better although it seem a bit narrow (perhaps the photos was squeezed?). The general style seem acceptable.
F Front	As above (GF rear)		Agreed providing it fit comfortably

			into the approved chimney breast
F Rear	As above (GF Rear)		As we now have a photo of what this looks like (I had not seen this before today) it should be as close a match as possible. I agree that it's similar to a slimmer Cambridge but there does not appear to be any moulding around the inner side of the opening.
S Front			Agreed
S Rear			Agreed

I hope this helps but if there's any doubt please don't hesitate to get in touch with me.

Regards

Hi Richard

Sure, we could make something similar

If we go very shallow- circa 60mm visible, we'd probably need to look at losing some of the depth detail, for want of a better term. There are quite a few levels here

Regards
Justin

Yes Justin

I think it is similar but the proportions are different.

The shelf depth and jamb depth are smaller on the original fireplace, the height of the foot block on the original seems smaller almost the same size as the skirting.

Also below is an image of an Soane Fire Place which I think Allan might comment on suitability as it was one of the Georgian models he had referred me to previously. If we got the proportions right this might be suitable ?

Regards,

Richard

Hi Richard

Do you think it looks a bit like as slimmer Cambridge here:

Hi Justin

Please see image below of fireplace style of 2nd floor.

Regards,

Richard
