2022/1680/HS2	Laura Craik	11/03/2023 17:12:33	COMMNT	I object to the current design as it is not appropriate to the area, and will significantly blight the views from primrose hill. There also appears to be no green corridor, as promised. HS2 has often publicised its use of BIM, so why can't it use BIM to show the true nature of what the vent shaft headhouse will look like? As it stands, I believe we are being deceived and I object in the strongest terms.
2022/1680/HS2	Nicola sinclair	10/03/2023 16:17:09	COMNOT	This ugly building will dominate and impede what was previously a significant green view, entailing the removal of over 500 healthy trees which will not be replaced locally further damaging the air quality of the area. It is far larger, higher and more visible from all angles than was implied at the start of the HS2 process.
