Subject: O2 scheme

Dear Councillor Sue Vincent

I've read the report on the Landsec O2 proposed scheme at <https://whgara.uk/>, having followed the progress of these plans for years now, at both in-person and online events. This has not been a consultation, because there has been absolutely no adequate response to the concerns that have been raised by local residents. They have been a mere PR exercise, to meet the consultation requirements.

It is not just as a local resident that I am protesting about impact of this plan, but as a human, with some sense of empathy for the people who will be doomed to live in those places – they are not desirable, nor are they designed for their wellbeing. They are designed to make the maximum profit out of the needs of the desperate. The planned design violates all the principles implicit in your “valid reasons to object to the Landsec O2 scheme as it stands”.

Camden Council and the members of the Planning Committee surely have ethical standards and values. It takes a great sense of public responsibility and personal sacrifice to give time to this exercise. Please remember your values, and reject these grotesque plans. The Council can surely do better. You have the power to change the way private commercial power operates. Please take heart and use that power on our behalf.

With best wishes
Diana
