Subject: O2 centre redevelopment

Dear Councillors

You are aware of the massive public opposition to this development and yet nothing is being done to stop this redevelopment. This is not in the borough's interest whatsoever but the pursuit of profit is the only motivating factor.

It is a gross overdevelopment of the area - just look at the JW3 development and impact it has had on the local traffic and amenities - and it is miniscule compared to this proposal.

There is not the infrastructure to accommodate 5,000 more people in this area - the roads, rail and all other infrastructure cannot cope with it. All amenities are already congested and at maximum capacity.

I have lived in the area for 20 years and have seen the over-development happening more and more - the area has become so congested and is already at maximum.

Put a stop to this development before it has disastrous consequences in the area. I have written to all 12 of you as you, as a body, need to pay attention to the massive public opposition to this development.

Tahir Ebrahim
