Dear Mr Fowler,

This development is going to have long term consequences to the areas immediately surrounding it which is where I live.

The O2 centre is barely 25 years old and serves as a community resource for shopping and restaurants. This density of construction is going to create huge problems with the water table, traffic and other amenity of the surrounding areas.

We see the pressure on surrounding green spaces already and this will make it more so. Besides the area is likely to become a building site for many years to come.

Finally, we are a family of five adults and will vote against the political party that votes this through as it is against the wishes of local people who politicians are there to serve in local government.

Best

Vivek Sood
