I am a home owner and resident of this conservation area where the Red Frog Association looks after this. As it is clear now we must work hard to protect the natural habitat for our carbon sequestration, plant and animal life wherever we can and Hampstead has rigorously pursued the protection of its natural habitat.

With regards to the case 2022/5583/P - It has been brought to my attention that the building of the 5 outhouses on what was once mostly unbuilt on land is clearly a breach of this conservation areas code and is a greedy land grab . It is also not what was agreed to so to this end please put a stop to this immediately.

Our property was turned down permission to build a tiny room (which would have gained us an extra space in our modest flat for our children to move in) on our roof terrace due to this conservation of landscape, architecture and potential light pollution so I do not see how this had been permitted!

Please be in touch if you would like more information on this issue

Regards
