2023/0910/P	V .Russell	04/04/2023 18:00:31	APP	<p>The steel beam measurements are not accurate. This is NOT minor alterations. These beams will not support the intended changes to the area above the windows. I am an interested party as one of the freeholders of this building.</p> <p>In addition, a complaint has been made - Complaint No. COMLR 5436 - to Building Control regarding the works being currently undertaken which we deem to be unsafe. The application states 'moving a kitchen to the living room.' The works are far wider than this, including moving joists, all walls (except one), floorboards, etc. This work was not designed by a qualified, chartered structural engineer. I am informed by Camden Complaints dept that this has been sent to the Building Control team. There is already damage to adjoining flats, as the work began 3 weeks ago. Please VISIT the site as soon as possible.</p>
