ABERDARE GARDENS

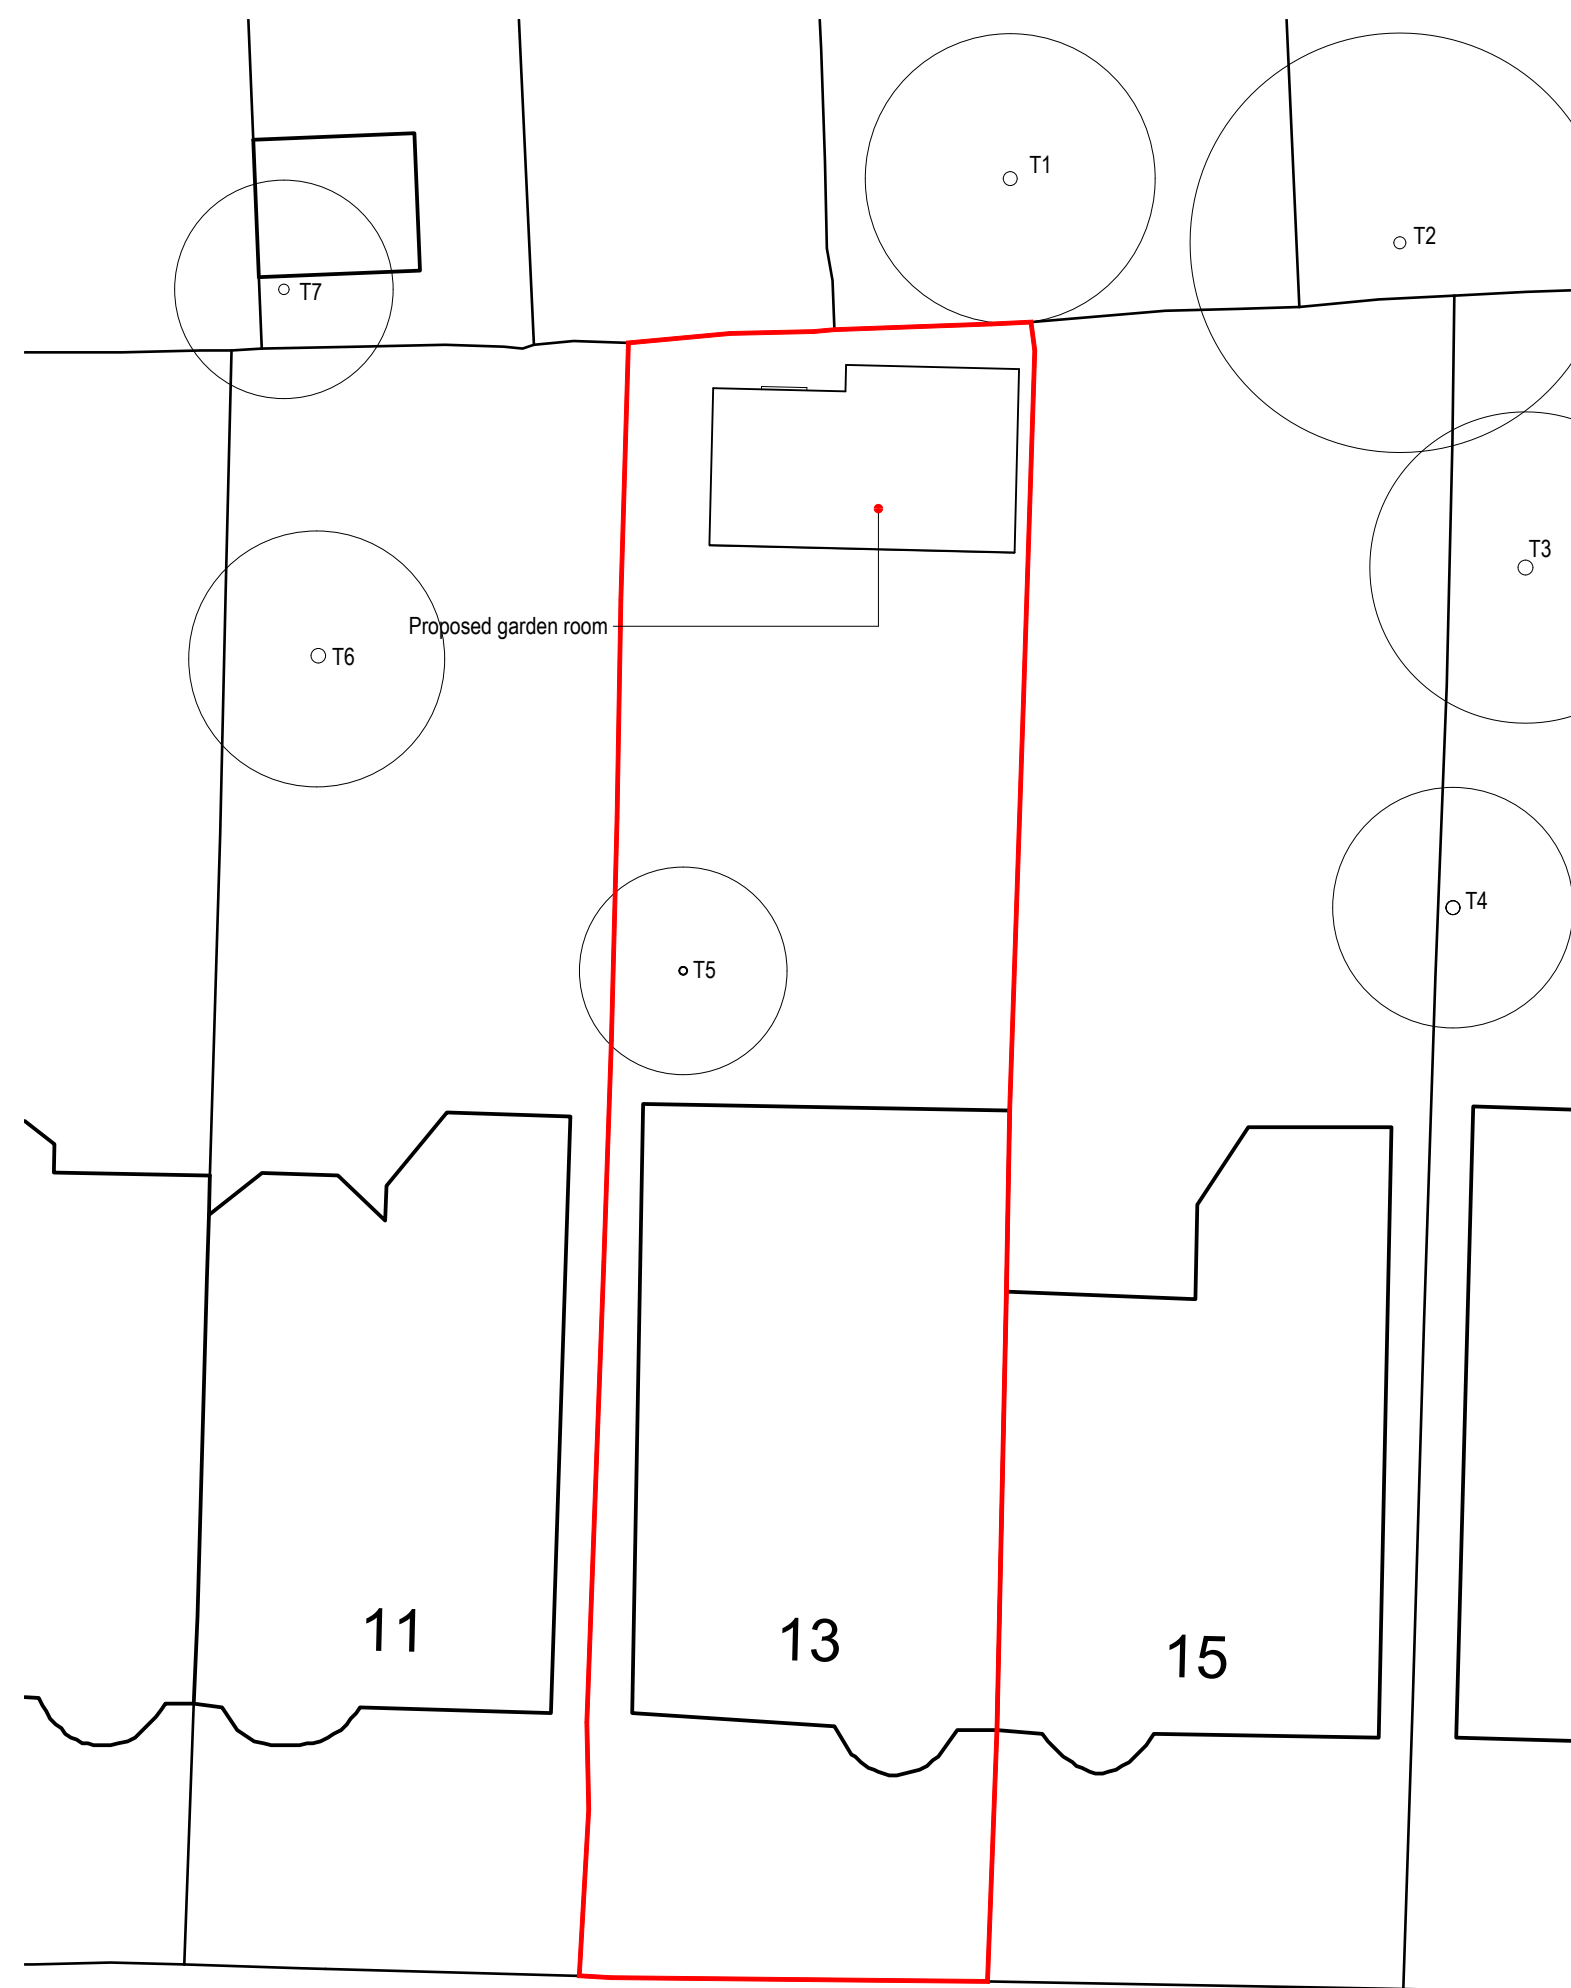

Block Plan As Existing @ 1:200

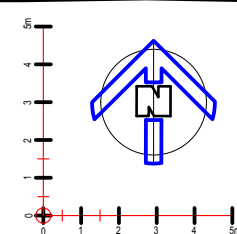

Front / South Elevation @ 1:50

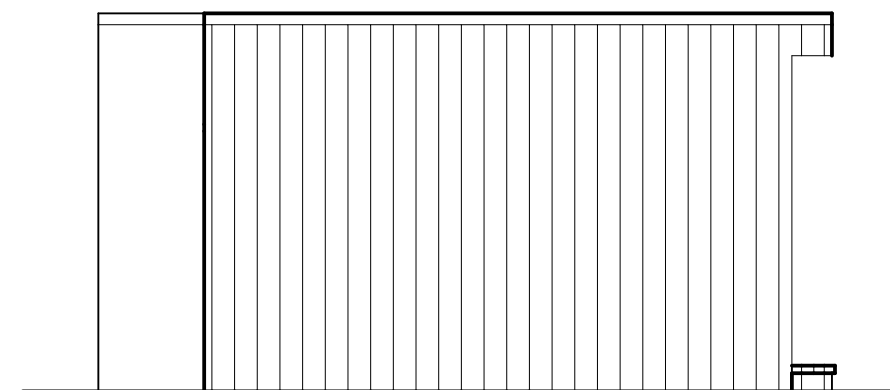

Rear / South Elevation @ 1:50

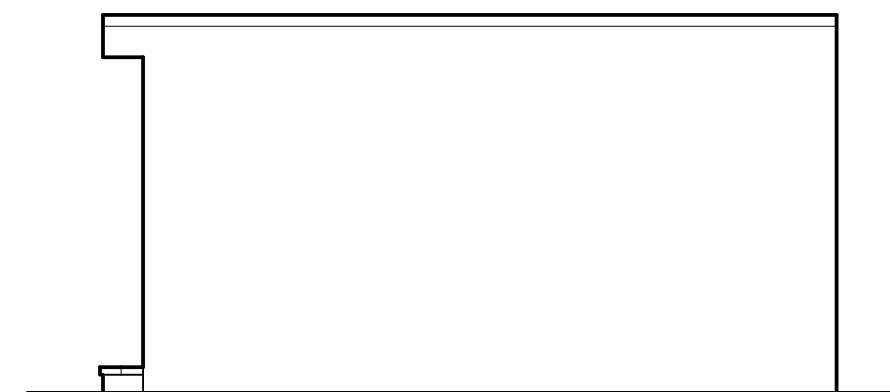

ABERDARE GARDENS

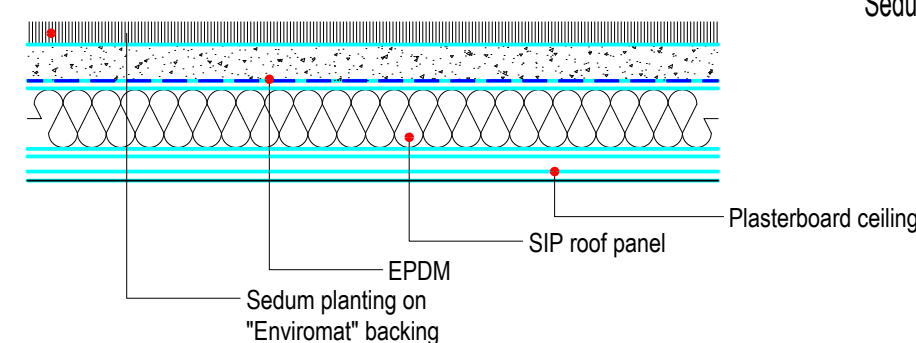

Block Plan As Existing @ 1:200

Left Flank / West Elevation @ 1:50

Right Flank / East Elevation @ 1:50

Sedum Roof Detail @ 1:10

Notes re sedum roof:

Maintenance etc:

EnviroMat is low maintenance with no need for daily watering and it doesn't need mowing or trimming.
EnviroMat Natural Green Roof Feed should be applied (in accordance with the written instructions) in early spring when temperatures begin to rise, and again in early summer to encourage flowering.
Generally EnviroMat is more likely to be damaged by too much watering than by too little.

Roof drainage outlets must be cleared out at least once a year.

EnviroMat can survive for a month or with no watering if watering is required. During a prolonged drought then twice weekly watering would be appropriate.

Weeding:

The sedum roof will be installed with a dense covering of plants. This makes it difficult for the majority of weeds to find a space to germinate in.
Any really persistent weeds can be pulled out by hand.

Planting mix + density:

90% coverage of mixed plant species, predominantly sedums.
Sown mix includes: Album, Ellacombianum, Floriferum, Hybr. Czar's Gold, Montanum, Kamtchaticum, Oreganum, Pulchellum, Reflexum, Rupestre Angelina, Sexangularare, Spurius 'coccineum' (Purple Carpet), Spurius, Spurius 'Summer Glory', Stenopetalum, Stoloniferum, Saxifraga granulata, Sedum Hispanicum

Site Photographs Showing Garden Room To Be Removed

Proposed Materials:

Walls:

Front + left flank elevations clad with kiln dried Larch

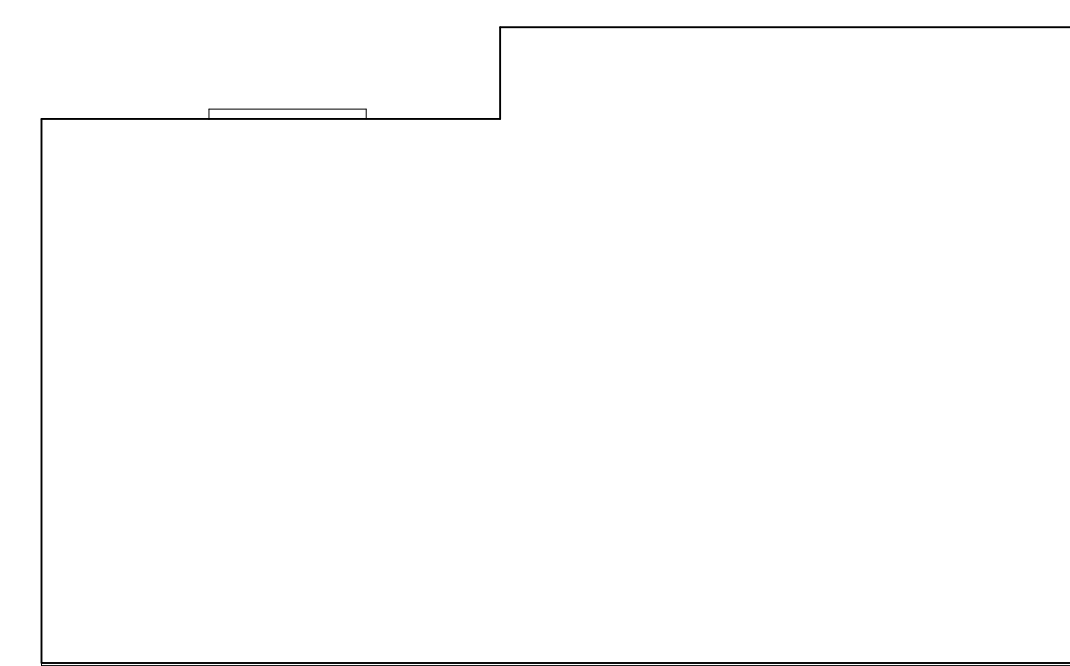

Rear + right flank elevations clad with cement particle board and finished grey "weathershield" paint

Windows + doors:

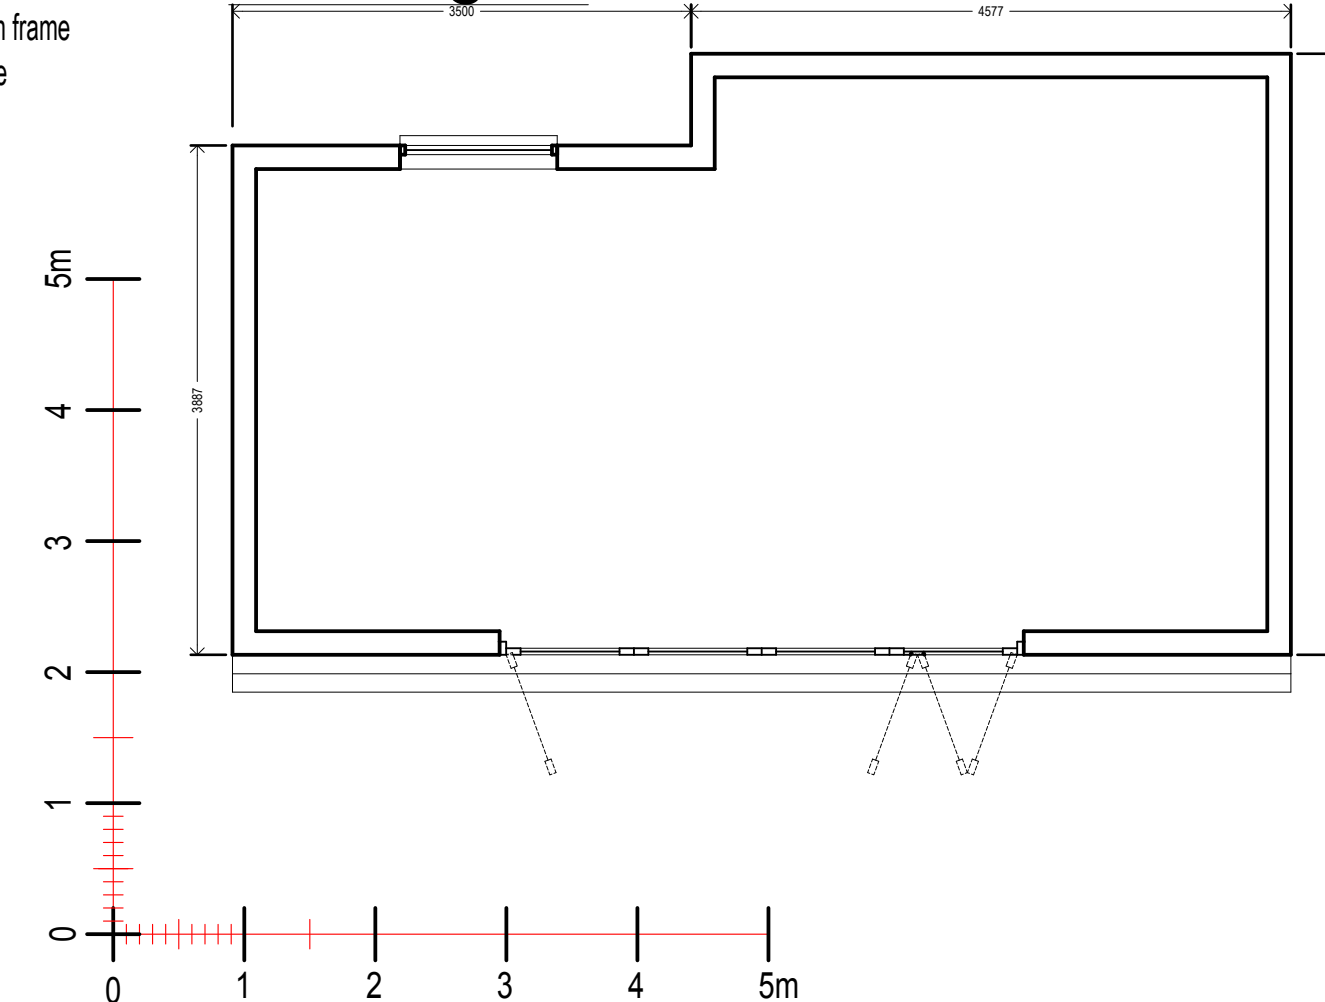

Anthracite / grey Aluminium frame fitted with high performance double-glazed units

Roof:

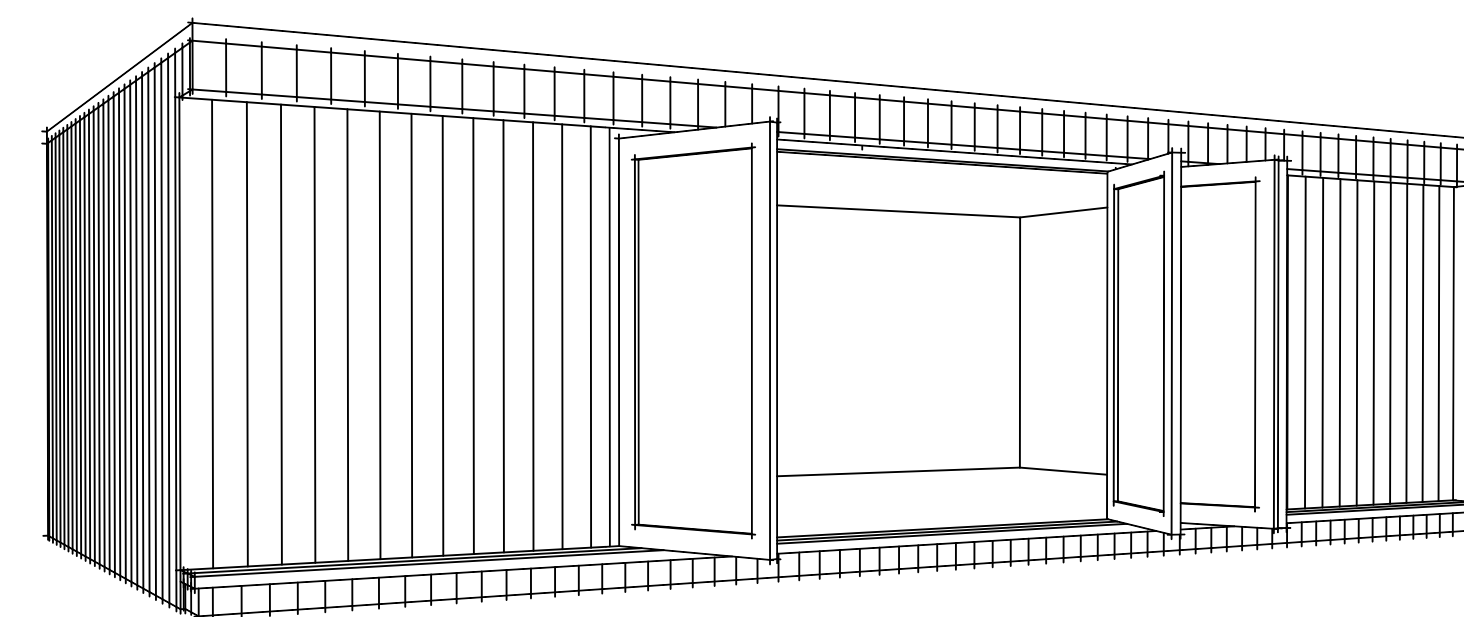

Sedum "Living" Roof
