

PLANT SPECIES OF VALUE TO WILDLIFE

 Species from the RHS plants for pollinators lists

 Native species

PLANNING DRAWINGS/CONDITIONS

The adjacent list of plants have been extracted from our planting schedules to show the native species and/or species of recognised wildlife value. During the development of the planting scheme the project ecologist asked that we use plants from the RHS “plants for pollinators” list as a benchmark for the term “Plant Species of Value to Wildlife”. We have included 45 such species within the scheme. The majority of the plants used for the project fall in to this category.

- | | |
|---|--|
|  | 1 Euphorbia Blue Haze |
|  | 2 Euphorbia mysinates |
|  | 3 Armeria pseudarmeria Ballerina Lilac |
|  | 4 Scabiosa baroccia |
|  | 5 Centaurea montana |
|  | 6 Origanum majorana |
|  | 7 Eryngium planum Blue Glitter |
|  | 8 Thymus serpyllum 'Minor' |
|  | 9 Allium cristophii |
|  | 10 Euphorbia rigida |
|  | 11 Sedum Autumn Joy |
|  | 12 Lavandula angustifolia Hidcote |
|  | 13 Stachys byzantina |
