SITE PLAN

39 Quickswood, NW3 3SA

THE CONTEXT, THE BUILDING & BRIEF

DF_DC have been instructed to develop a proposal for a roof extension to the house at no39 Quickswood, in line with other similar developments in the area. This application is part of a group for the same terrace. The following document contains an assessment of the site, precedent and a description of the proposal.

The house is part of the Quickswood sector, one of the areas of the Chalcot Estate which extends to the north and south of Adelaide Rd. It was developed in the 1960s as a sort of modern terrace type with an internal road from which the houses are accessed, originally comprising of a ground floor plus 7 split levles including a roof terrace . The rear gardens face the main roads surrounding the block along north and south, setting back the building line from the public realm. The house is part of a seven-house row, with unified fronts and with a looser rear condition, with some of the houses having been extended. The local community association imposes a series of design guidelines on the form and aspect to secure a cohesive urban image.

Windows on the upper stories are aligned to both sides of a panelled pier, grouping vertical features in a modern key. Our proposal respects these alignments and will use materials to match the existing elevations. There will be no change to the access arrangement. A sunlight / daylight study will be included as part of this submission.

_Front facade of no.39 Quickswood

DESIGN PROPOSAL

The design proposes a roof extension using the same materials and compositional principles of the existing house and estate.

MATERIAL PALETTE

Our proposal works with materials and construction techniques in order to closely match to the existing aesthetic. Dark brick will be used and laid in stretcher bond to match the existing. The rendered band will be painted in white, railings in white and aluminium framed windows in white to match the existing.
