

A number line starting at 0 and ending at 10m. There is a jump discontinuity at 5m. The function is defined as $f(x) = 1$ for $0 \leq x < 5$ and $f(x) = 2$ for $5 \leq x \leq 10$. The graph consists of a horizontal segment at height 1 from $x=0$ to $x=5$ (with an open circle at $x=5$) and another horizontal segment at height 2 from $x=5$ to $x=10$ (with a closed circle at $x=5$).
