Hi,

I'm writing to you regarding to the planning application (ref.2022/3853/P) which relates to Camden Lock Market and the development of new exhibition spaces, installation of new retail shop fronts within West Yard, opening up of Dead Dog Basin and the erection of a temporary observation wheel in Camden.

I have been a resident of Camden Town for more than two years now and I would like to bring forward a couple of reasons as to why I support this project.

I believe that in the past few years, Camden Market has become more than just a regular point of attraction. It has developed in a positive way by creating a place where all sorts of activities and facilities are brought together but at the same time also maintaining the architectural heritage.

Moreover, Camden Market has become safer, as the area is protected by security teams. The construction of the ferris wheel and the opening of exhibition spaces would be ideal for families who would be able to engage in fun but at the same time also educational activities.

In addition, the restoration of the "Dead Dog Basin" would create a unique destination experience, as it would be the first time this underground water heritage opens. This would be a new and iconic point for the passenger water boats.

Taking into account these points but also many others, I support this project.

Kind regards,

Miruna Duta
