I write in connection to new commercial development plan for the Camden Market area to install the Ferris wheel.

I appose the suggestion for this as this is already a very crowded part of London.

- there are not enough facilities for public ie very limited toilet provisions.
- This will have negative impact on historical buildings in the surrounding area.
- The height of the wheel will result into local residents privacy being affected.
- Transport system is already disrupted due to cycle lanes and narrow road space. This will create more strain on roads and parking for local resident.
- I agree with the MET response of increase in crime related activities.

Therefore this plan should not go ahead as already so much has been overtaken by new developments.
