In regards to condition 7:

-In terms of heating, if the proposal would include Air Source Heat Pumps, these should be clearly annotated on the plans. LETI guides or Retrofit and Climate Emergency are quite helpful in this regard.

-Based on previous assessments presented to us, we found that the levels of Air pollution NO2 (Nitrogen Dioxide) and PM10, PM2.5 (Particulate Matter) was very high and therefore mechanical ventilation with air inlet ideally from the roof was required, and windows fixed shut at 1st and 2nd floor levels, front and rear, and winter gardens not balconies to the rear. You would need to undertake a new Air quality assessment to demonstrate if these assumptions are still valid.

In regards to condition 8:

-Based on previous assessments presented to us, we found that the levels of Air pollution NO2 (Nitrogen Dioxide) and PM10, PM2.5 (Particulate Matter) was very high and therefore mechanical ventilation with air inlet ideally from the roof was required, and windows fixed shut at 1st and 2nd floor levels, front and rear, and winter gardens not balconies to the rear. You would need to undertake a new Air quality assessment to demonstrate if these assumptions are still valid.

In regards to condition 12:

-In terms of security, given the existing undercroft, careful consideration is required in relation to the proposed lift doors and cycle facilities storage.

-Crime officers advised that the lift door should be SR2 security rated leading into the lift lobby with destination control with key fob activation. Importantly, the lift should be come active only when the lift lobby door is closed.

-You should consider data login on all access points, which would provide a digital log for the management company and notify when someone came in.

-You need to consider where the mailbox could sit securely within the building or outside to reduce the need for the postman to enter the block every time, as this would reduce the security rate for the building.

-A lighting strategy should be provided for the undercroft area and measures taken to make the space more inviting.

-You are advised to acquire a Secure by Design Accreditation for residential development.
