

- 2022/4777/P 1-7 New Oxford Street OBJECTION

■■■■■

- Replacement of high level windows with louvred panels for kitchen extraction and fresh air intake.

Observations

- o It is noted that the drawings are absolutely terrible and make no sense whatsoever.

The title sheet files are in Cantonese. This is a typical useless application.

- AJ reports that the changes, as usual, have already been undertaken.

- OW notes that as usual there is hardly any point in objecting, commenting, or doing anything as the enforcement team will not take any action.

- Nevertheless, the building has recently been refurbished to a high standard by Orms.

The windows are of a uniform character and high standard. Some are already partially louvred. There is no need to replace a full window with louvres. It is poor design.
