

2023/0651/P Tavis House OBJECTION

[REDACTED]

■ GPDO Prior Approval – Telecoms Base Etc

Observations

■ It is noted by MJL And DR that the officer is [REDACTED]

CAAC comments.

■ The application DAS is poor and has wrongly identified the application site in the photographs.

■ Telecoms are inappropriate in a conservation area.

■ It appears this is another overly complicated and PR-type application which is intended to be taken straight to appeal.

■ Noted some elements of the telecoms are 4 metres plus in additional height.

■ It is recalled that there is already a rooftop extension and terrace approved in this location, so it is not fully understood why this application has come forward.

■ Nevertheless, telecoms causes harm to the architectural significance of the conservation area while bringing very minimal benefit.

■ The committee objects.
