

# Carkers Lane

## Birch walk and raingardens

The “Carkers Lane” aims to bring back its historical character as a route connecting Highgate Road through the meadows towards the future Murphy’s Yard. It is treated as a lane with rain gardens on each side of the central path. The route is direct and navigable. The planting strategy is developed to emphasize the directionality of this areas and to suit the proposed informal and woodland character.

Existing site entrance outside of red line

Existing parking area

Raingardens with birch trees on both sides of pedestrian path
