To whom it may concern;

Herby accept this communication in support of the latest project from LABTEC in Camden Market. Camden Market Application- 2022/3853/P

Having been a camden citizen for more than 30 years I have created various community engagement projects with Camden Council.

This project I believe will add another dynamic for both tourists and locals by adding a new level of culture, excitement an engaging experience for all.

I am currently a trader in Camden Market and I know LABTEC very well and I am sure that they will allow these new areas to be accessed freely by the local community groups and schools and I think the idea of the ferris wheel is spectacular and shall be visited by tourists as well as locals community creating a new addition to the skyline which is monumental.

I have no doubt that this new phase will be constructed and delivered with such Labtec style which had been a blessing to the market and has uplifted the whole area in my opinion.

Your sincerely,

Mark Hall
