Subject: 2022/3853/p Ferris wheel

IAs a local residents I object to the planning application for a 12 storey Ferris wheel at Camden lock.

At ca 12 storeys it dominates the surrounding listed three story buildings and has a significant impact on the daylight and privacy of surrounding residential buildings. Such an impact would serve as a planning blight on residential homes nearby for the 5 years as the only other Ferris wheel in London started as temporary structure only to be extended after its initial 5 year license
The proposal should be rejected on the basis of impact on adjacent homes and right of residents to enjoy privacy in thier won homes and gardens
