Dear Sir/Madam,

I am writing to express my strong opposition to the planning permission for the building of a giant wheel in Camden, under reference number 2022/3853/P. As a resident of Camden, I am deeply concerned about the potential impact that this development could have on our local community.

First and foremost, I believe that the construction of a giant wheel in the heart of Camden would be an eyesore and a blight on our neighbourhood. The sheer size of the proposed structure would be out of proportion with the surrounding buildings and could negatively impact the character and visual appeal of the area.

Furthermore, I am concerned about the potential noise and disruption that the operation of the wheel could cause. The constant hum of machinery and the sound of people riding the wheel could be a significant source of annoyance for residents who live in close proximity to the site.

Finally, I am worried about the potential safety hazards associated with such a large and complex structure. While I understand that the developers will take all necessary precautions to ensure the safety of riders and visitors, accidents can and do happen. The potential risks associated with the operation of the wheel are simply too great to justify its construction.

For all of these reasons, I strongly urge the Camden Council to reconsider its decision to grant planning permission for the construction of the giant wheel. I believe that this development is not in the best interests of our local community, and I implore you to take action to prevent it from moving forward.

Thank you for your attention to this matter.

Sincerely,

Maria Giuliani
