2023/0098/P	Margaret Crowe	23/05/2023 08:31:35	OBJ	This application should be rejected as opposite this building is a 375 resident housing estate. The noise that this outside space can cause untold noise disturbance. It is appealing that in this small area we are bombarded by noise at ground level and now they want to bombard us with noise at roof level too. The residents in Odhams Walk are sick to death of being disturbed day and night.
