2023/1481/P	Anthony Aughterson	27/05/2023 11:00:43	OBJ	<p>My house faces directly the side of 36 Charlotte St (the north elevation on the plans).</p> <p>I have three concerns.</p> <p>1. The proposal is to install lighting in the window recesses. (I) This lighting changes the nature of our street - by making it seem more a place of commerce rather than residents. Colville Place is a unique and beautiful residential street and this move spills the commerce of Charlotte St too far into the Colville Place zone. (II) If the lighting is bright or not shaded correctly it will spill into our kitchen and living areas.</p> <p>2. The sign on the side of the building. This like my point 1(I) above changes the feel of Colville Place from tranquil residential to commercial. Something I think does not benefit the area.</p> <p>3. The colour scheme chosen. The virtually black paint that has been chose will suck natural light from the street and I do not think is in keeping with the look and feel of Colville Place.</p> <p>Please could you take these concerns into consideration when assessing the application?</p> <p>I look forward to hearing from you.</p>
