2023/0692/P	Simon Legg	07/06/2023 22:02:41	OBJ	<p>The disturbance of sub-ground is of a significant concern in constructing a deep basement. The non-maintenance of the basement pumps could cause significant movement and land heave around neighbouring properties. There is a risk of flooding due to the increase of the hard-standing area, this would reduce the water absorption into the soil. Where will the water go from the proposed pumps? Could there be a subsidence risk to surrounding properties.</p> <p>We therefore object to the basement plan in its entirety.</p>
