Subject: Resident of Espalier Gardens. Strong vote to not cut trees in Kilburn Grange Park 2023/2333/T

Dear Camden

Residents of Espalier Gardens were not made aware of this application and we found out about it via Twitter (link below) and when the voting was already closed. This is really not ideal.

very sad to see that @CamdenCouncil are planning to reduce significantly the tree cover in Grange Park. These trees impact on the new builds, but were there before developers decided to build right to the boundary.

I live at Espalier Gardens, my flat is in front of T55 and T57 and although they block my view completely these trees have been here before the building and they should be left to grow as nature intended.

T57 houses a lot of wildlife and if this is pruned, even at the slightest, it will distrust the housing of squirrels, wood pigeons, magpies, insects, etc. It would be almost a crime in my personal view.

I am the one mostly affected by these trees but I love them and I oppose to the trimming or cutting even slightly completely. They should not be touched.

I will communicate this on Twitter as well, so everyone understands that this application was not even made aware to residents of espalier gardens.

Thanks

Michel Pelisser
