Dear Mrs Lombard,

PROPOSED UPGRADE TO BASE STATION INSTALLATION AT CTIL_13657430 BEDFORD HOUSE, 125-133 CAMDEN HIGH STREET, LONDON, NW1 7JR (E528968 / N183697)

Cornerstone is the UK's leading mobile infrastructure services company. We acquire, manage, and own over 20,000 sites and are committed to enabling best in class mobile connectivity for over half of all the country's mobile customers. We oversee works on behalf of telecommunications providers and wherever possible aim to:

- promote shared infrastructure
- maximise opportunities to consolidate the number of base stations
- significantly reduce the environmental impact of network development

Cornerstone and Telefónica are in the process of upgrading their existing telecommunications radio base installation in the Camden area. The purpose of this letter is to provide you with information on the proposal and the opportunity for you to seek further information should you wish to do so.

As part of Telefónica's continued network improvement program there is a specific requirement for an upgrade to the existing radio base station at this location to improve Telefonica 5G coverage in the area.

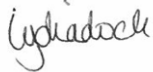

The proposal, which we feel is the best solution to serve our customers in the local community, will include:

- Removal of existing 4no antennas and the addition of proposed 4no antennas on new support poles fixed to new freestanding frames
- Removal of existing 2no antennas to be replaced with proposed 2no antennas
- Ancillary development thereto to include the removal of existing 4no Remote Radio Units, the removal of existing 2no Remote Radio Units to be replaced with proposed 5no Remote Radio Units on existing freestanding frame, and the addition of proposed 10no Remote Radio Units on new freestanding frames

All Telefónica installations are designed to be fully compliant with the public exposure guidelines established by the International Commission on Non-Ionizing Radiation Protection (ICNIRP). These guidelines have the support of UK Government, the European Union and they also have the formal backing of the World Health Organisation. A certificate of ICNIRP compliance will be included within the planning submission. In fact, because of the very low power utilised by telecommunications sites the emissions will be many times lower than the ICNIRP threshold.

We would welcome your views (within 14 days of the date of this letter) before we finalise the proposal and submit the planning notification to the Local Planning Authority.

Yours sincerely,

Lydia Dock
