

Application No:	Consultees Name:	Received:	Comment:	Response:
2023/2389/P	Jonathan Byatt	17/06/2023 12:33:07	OBJ	Objection: this application lacks any consultation with neighbors in similar properties within the row. Every single picture in the plan and the elevations only shows a single detached property. The additional flow will significantly change the lines of the existing row of houses. This would need consultation with neighbors to understand the impact and Gain the necessary cooperation. Any change would significantly impact the neighbours who live in close proximity from a build and sites development perspective. There is also to be considered the structural impact to the Neighboring properties which is not been explored. This objection is purely based upon the change to an existing neighborhood where further consultation may be required.
