Subject: Objection - almacantar / center point

Dear camden

I write to strongly object to Almacantar's planning permission to erect screens and seating in St Giles Square for three full months, starting from July 2023.

This is yet another occurrence of Almacantar applying for step changes in permissions on top of previous permissions to get what they want in the end and camden enable them

So many examples across licensing and events where almacantar play this game of always asking for a bit more until they get what they want so at every stage it seems like a small amendment to the baseline but in aggregate they have destroyed residents lives and camden council give them what they want.

This noise in the square from past events is already proven to get out of control and need to be shut down - it's too close to residential building at center point house - people can't work from home , kids can't study. Everyone can't have quiet enjoyment of their flats - STOP THIS

Almacantar (with camden council support) have turned this square next to centre point and the tube station house into a hub of anti social behavior, Drug dealing, crack and mainline drug taking , alcohol , urinating , drunken antics, threatening behavior , mental health issues, - why does no one care how this area has been destroyed as is now very dangerous, all whilst Almacantar focus is to make profits from ultra luxury apartments in centre point tower that benefit precisely no one

Camden council have a long track record of letting Almacantar run riot in this area by cosying up to this big corporate and it's profiteering ridiculously prices apartments in center point tower all at the expense of tax paying residents. We have lost natural light in our building, we have suffered years of construction and we are constantly bullied by Almacantar as they try and push us out of our homes - can someone please stop them doing this?

True to form Almacantar try and sneak this latest application through (no one was made aware and our rights to object denied) and true to form camden council are enablers of corporate greed - any look back on all the planning permissions, licenses show camden council do not care at all for the long suffering residents who pay council tax that fund their entity - one day I hope we get accountability for these abuses of power.

Ed
Centre Point House
