Subject: RE: Approval of details application - 2023/0786/P - Car Park, Old Brewery Mews (condition 4 - living roof)

Dear Tony

Having spoken to a landscape architect I use on other projects he suggested we use the Bauder XF 301 system for this particular project.

You will see from the attached link that they refer to 11 species being included within the green roof system but do not specify them individually. My landscape architect was surprised they need to be detailed to meet the planning condition.

<https://www.bauder.co.uk/green-roofs/extensive-green-roofs/lightweight-sedum-low-maintenance-solution/sedum-blanket-system>

Is this enough for you to be able to conclude the condition application?

Kind regards

Andrew
