2022/4885/L	Rachel	01/07/2023 23:26:52	OBJ	<p>The renovations that took place in this property approx., 2005 have caused me much upset and distress over the years. The owners husband completed the building works all day and night and weekends for many weeks without any consideration for the neighbors.</p> <p>Kitchens and bathrooms have been built without any consideration or notification. I now have a kitchen on my living room wall and a bathroom and sink on my bedroom wall. The property is let out as short term lets people coming and going all night and day. It is not possible to relax in my living room most of the time. I think the pipe work has been altered and I can hear all the appliances and water running in my living room most hours of the day and night. If they had of consulted with the neighbors, they would have been aware this would cause a lot of noise and disturbance to their neighbors. I did try to discuss this on many occasions but the owner was very dismissive and unhelpful.</p> <p>I can hear the tap/ kettle/ microwave banging of washing up and basically everything you would expect from being in the kitchen. Sometimes there are many people in these spaces the noise is unbearable and I have had many nights with no sleep having to go to work the next day exhausted.</p> <p>As the property is let out to short term lets, multiple people come and go at all hours so it is not possible for me to sleep in my bedroom most nights as they use the shower which has been built on my bedroom wall. The fan goes on and off all night and no insulation has been put in the wall, so the noise from multiple people in the shower at all hours means I am woken most of the night. The sink is also placed on my bedroom wall so they stand there talking and I think there is a glass shelf on the other side of the wall as I hear rattling and banging most nights which keeps me awake, its like they are in my bedroom with me. I don't understand why she made the bedroom at the back of the house when mine was at the front. If she had bothered to ask that would have been something she could have taken into consideration and I could have slept too.</p> <p>Please can I be considered before permissions is granted to No 4 for building works, I would like them to correct the renovations they have already done with consideration to the time of day they work and not to include weekends and evenings. I would love to be able to sleep in my own bed and live in my home in peace, my health has suffered due to their choices. Please can the shower rooms and kitchens be removed so I can kept some sleep and rest.</p>
