

The recommendations contained in this Report represent Highland Arb's professional opinions, in exercising the duty of care required of a suitably experienced and qualified Arboricultural Consultant / Surveyor. All data recorded and recommendations made are based on observable factors present at the time of inspection. Inspection consisted of an aerial visual inspection.

Author: Florian MacLaren (Arboricultural Consultant / Surveyor)

Survey Date(s): 29/06/2023

T32 Poplar- Has a large open cavity at approx. 6m in main stem (with an t/r ratio of less than 10%). It also has large Perenniporia brackets growing in the cavity which extends up and down into the stem. This has been missed in the past due to tree being heavily covered in Ivy. This tree needs to be removed as soon as possible under a DD exemption notice.
