## Planning Condition 11

Dear Gianni,

We are writing in response to Planning Condition 11 for the project at 13A Pond Street, London.

The Energy Strategy Update document issued by Integration on 02.12.2019 stated that the house's entire space heating and domestic hot water demand was to be met with an air source heat pump.

I can confirm the house has been constructed in accordance with this energy strategy and the photographs below show the air source heat pump installed. The heat pump has been installed within a dedicated acoustic enclosure in the corner of the rear garden.

# Integration

Yours Sincerely,
