

I would like to support this application and I hope it is permitted on appeal.

I have no connection to those making the application but I do live in the local area (Kentish Town) and I know how desperate we are for more housing!

We should be encouraging proposals like these that increase housing supply in a way that impacts the local area LEAST (i.e. building on top of what is already there). If we refuse applications like these, how are we ever going to increase Camden's housing stock?
