Subject: FAO Tree Officer - permission to prune trees blocking street light in Belsize Crescent

I am requesting permission to prune the trees outside 7 Belsize Crescent which are significantly blocking the light from the street lamp at night directly outside the house.

I attach 3 daytime photos showing how the tree branches surround and cover the light and 4 photos taken at night which show how the light from the street lamp is significantly blocked for pedestrians passing in front of the house.

The proposal is to thin the crown by 35% and to reduce the crown by 30% and reshape accordingly to ensure the light from street lamp is not obstructed.

Please let me know of any queries.

Yours faithfully
Gillian English
