Sirs

I note that the submission now includes details updated 9/05/23 green roof details which I have only just seen These are standard manufactured details by Bauder They do indicate this roof system requires access for maintenance and their details illustrate the need for safety leading edge protection to parapets Checking the design details I note that none have been illustrated within the Surrey sections and elevations This clearly will add a raised profile to the roof line and is a glaring omission by the applicants My original objection still stands Kind regards Shane Rooney
