As an avid horticulturist residing on the \_\_\_\_\_, I am deeply distressed by the proposed redevelopment. The terrace, 4th-floor, and 5th-floor back extension are alarming as they will significantly impact my gardening efforts. The new

floor will obstruct our sky view and rob my plants of vital sunlight, which they depend on for healthy growth throughout the year. For the past four years, we've been able to grow our own vegetables, fostering a sustainable lifestyle that brings immense joy. Losing approximately 7 hours of sun in the summer will undoubtedly hinder our ability to grow food as we've done so passionately. As someone who has struggled with severe depression and found solace in creating a beautiful green space, this will have a hugely negative impact on my mental health.

The terrace, once a peaceful retreat for me amidst the bustling city, now faces potential noise disruptions from the courtyard. Such disturbances will adversely affect the sense of tranquillity we feel in our outdoor space. I wholeheartedly align with the Friends of Parker St group's objections, as their concerns resonate with the deep impact this redevelopment will have on our gardening endeavours and the precious urban wildlife we cherish. I urge decision-makers to consider the invaluable role our gardens play in creating a harmonious and sustainable environment for both us and the wildlife in our densely populated neighbourhood.
