2023/2480/P	Simone Gozzetti	24/07/2023 11:43:24	SUPPRT	I fully support the installation of new antennas in the area. The signal is highly patchy here, and in many spots, I can't connect at all. Data transmission is non-existent in some streets. I hope this installation brings more stability, performance, and consistency to cellular and data services.
