Subject: Tree work

I would like to remove a tree in my garden.

Address 41 Willow Road. In the conservation area. The house is Grade 2 listed but there is no TPO on the tree.

The Tree - is a palm tree and growing very rapidly and nowhere near its ultimate height. It is near the garden wall and adjacent property and I would like to remove it before there is any question of damage to nearby walls.

Replanting - with a *Rhus typhina* 'Dissecta', lower growing, very ornamental, very suited to that site (dry and shaded - under my neighbour's large sycamore).

Please tell me how to go about this. How do I apply - does it go through on the building planning permission form?
