Sirs,

I write in the most strongest terms to register my objection to the proposed plans to abolish the exiting Travelodge building, on Museum Street, and to build a massive, ugly, CLIMATE DESTROYING building in its place.

This will have an immediate impact on the adjoining area not to mention the out lying catchment area. The six existing buildings on West Central/Museum Street have a Grade 2 listed building status from Historic England .

Surely the way forward is to repurpose existing buildings? Just look at what is currently happening in Europe with the devastating affects of Global Warming. Come on Camden, remember your GREEN POLICIES.

Fingers crossed for a happy outcome, for local residents and the Planet.

Yours faithfully,

Jane Barton-Winder
