Dear Sirs

I am writing to object to the plans to replace the Travelodge Tower with the monstrosity proposed to replace it. The building is far too large and ugly to fit in the environment. Additionally it isn't retrofitting the existing tower which is contrary to the climate change policies of the UK, Greater London Council and Camden who all advocate retrofitting. It adversely affects local listed buildings and has far too little service entrances to serve such a huge building.

As a Camden resident I object to these plans.

Yours faithfully
