2023/2341/P	Joanna Silver	27/07/2023 22:22:49	OBJ	Re: Opposition to Planning Application for Telephone Mast on Fortune Green Road

Dear Sir/Madam,

I am writing to express my strong opposition to the planning application for the installation of an 18-meter high 5G telephone mast on Fortune Green Road, outside Hampstead Cemetery. Despite previous applications being denied, I am deeply concerned that this application is being considered again.

My main concern revolves around the potential implications on public health, especially on the well-being of children in the surrounding area. The proposed location is in close proximity to numerous schools and nurseries, as well as residential streets mainly populated by families. It is highly distressing to consider the potential risks associated with electromagnetic radiation emitted by such a structure, particularly when children, who are more vulnerable to its effects, are present nearby.

Numerous studies and public debates have raised health concerns related to the proximity of telecommunications infrastructure, such as 5G masts, to residential areas. While I understand the importance of advancing technology, it is imperative that the potential health risks are thoroughly and independently assessed before proceeding with any project of this nature, especially in densely populated areas with a significant number of children.

In addition to the health concerns, the proposed placement of equipment boxes on the footway will only exacerbate the already existing pavement clutter in the area. This may pose safety risks and hinder pedestrian movement, particularly for parents with young children, elderly individuals, and disabled citizens who rely on clear and accessible pathways (including those at the care home situated opposite).

I urge Camden Council to carefully consider the implications of this planning application and take into account the overwhelming opposition from concerned residents, over the multiple applications. I kindly request that the Council prioritise the health and well-being of its citizens, especially the vulnerable members of our community.

Before making any decision on this matter, I sincerely hope that the Council conducts a comprehensive and impartial assessment of the potential health risks and thoroughly consults with experts in the field. Additionally, public consultation should be thoroughly conducted to ensure that the voices of the residents are heard and their concerns are taken into account.

I appreciate the Council's efforts to improve communication infrastructure in the area, but I firmly believe that it should not come at the expense of public health and the quality of life for its residents. As a result I strongly oppose the planning application.

Thank you for considering my objections to this planning application. I trust that you will make a decision that puts the well-being of the community first.

Yours faithfully,

Joanna Silver
