Details of the pre-application advice received

Written pre-application received on 13th June 2023. Once we received pre-application advice, design revisions were made and we sought further advice from the planning officer. The subsequent advice which was received on 10th July 2023 was more positive. The following advice was received by us for the proposal:

"I've had a look at the drawing that you've sent with the revised works. Obviously I cannot properly assess any proposal from only a 3D image, but I would say that the design that you have sent does appear to move the proposal in a less harmful direction. There appears to be less alteration to the most visible face of the building (in that the works to this elevation would just involve imitating the floor below rather than creating a roof terrace), so this would potentially result in less harm caused. There do still seem to be elements that could cause concern, such as the new fenestration not exactly matching the existing below, the amenity impacts of the new terrace location, and the size of the rooflight. I do also have some concerns as it appears that the eaves of the roof would line up with the top of the boundary wall – this may be an inaccuracy in the drawing, but if this were to be correct, I would assume this would involve raising the boundary wall to the rear side(s) of the property, which we would not encourage.

I would naturally recommend that it would be best to seek additional pre-application advice, particularly so that the design and amenity impacts of a revised approach can be assessed. However, I would suggest that if you were to submit a full application, the current design does seem to be less harmful than the previous iteration – though this is of course just my opinion and not a complete officer assessment."

We made further changes to the design to capture the above comments, such as the fenestration matching the windows below, the roof light sizes have been reduced and the boundary wall is not being raised. We believe that we have provided sufficient drawing information and additional information in the design and access statement to highlight that the terrace amenity is not insensitive to the mews, and in fact most mews buildings have terraces which are either original or added at a later date through planning applications. There is no symmetry in the mews and no consistency in the datum height.

## Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?

- Yes  
 No
