Dear Camden

I am writing to express my real concerns about the above referenced proposed development.

The proposal adversely impacts a number of listed buildings of architectural and historical importance.

It would also adversely impact adjacent listed buildings including St George's Bloomsbury, the British Museum and Bloomsbury Square.

I am also very concerned about the adverse environmental impact of the scheme. The development exceeds UK's net-zero CO2 emission legislative target and fails to meet any of the GLA carbon targets. I understand the developers acknowledge the up-front embodied carbon impact of the scheme.

Permitting the development would be at odds with many local interest groups and residents. I urge the council to refuse the proposals.

If I can assist further then please do let me know.

Kind regards

Barry Hembling
