Subject: 1 Museum Street is 2023/2510/P - OBJECTION  
Importance: High

Dear Camden Planners,

At Climate Emergency Camden, we have tried hard to believe that you care about the climate and ecological emergency, and want to do the right thing. Yet, over and over, you continue to approve plans to demolish and rebuild, which everybody knows is many times more carbon-intensive than refurbishment, and which neither Camden nor the wider world can afford, if we're to keep warming anywhere near 2oC.

So I am baffled that you look set to approve yet another of these plans, above.

You will have heard the raft of other objections from Save Museum Street, but from my perspective this is the overriding one.

Please, please, start to do the right thing and act responsibly, for all our sakes.

Yours,

Sheila Hayman  
42 Rochester Place, NW1 9JX
