2023/2773/P	Elena Merzlyakova	14/08/2023 08:58:21	COMMNT	1. The installation of the electric gates will create an additional traffic jam that already takes place every working day on Frognal Lane in the morning. 2. The gates and wall are done in absolutely different style to the existing wall and all walls on the streets in this area. Hampstead is conservation area and the feel and look of it should be preserved. I object strongly for both installation on electric gates and change the look of the wall. 3. I support installation of electrical vehicle charging points.
