2023/3342/T	Prof Susan A Collins	16/08/2023 09:27:08	JUST	I would be very concerned about the loss of yet another tree with a TPO in this conservation area without very good reason. The tree report has a not on it that a tree should not be felled due to the Tomograph report alone (as this could indicate a number of things) so I would be very concerned if it was felled without due diligence and further investigation. It takes generations for a tree to grow to this maturity and we need these trees for carbon capture, noise capture, shade and for many environmental reasons (as well as aesthetic ones). So please investigate further before approving a decision to fell.
