Subject: 58 BELSIZE PARK GARDENS NW3 4ND - planning request to fell diseased ash tree in back garden

Dear Camden,

Re: 58 Belsize Park Gardens, London, NW3 4ND - removal of ash tree in rear garden

I am writing to request permission to fell the diseased ash tree in our back garden. The attached photos show the fungus that has grown quite rapidly in the last two months on the main trunk and one of the upper branches. I attach too a full report on the tree from an arboriculturist, Simon Pryce.

We have lived at our current address for over 30 years and we are very fond of this tree but Mr Pryce has recommended felling it as soon as possible, as it is a health & safety hazard if we leave it much longer.

Let me know if you need any more information.

Kind regards,

Peter Green
