Importance: High

Hi Tony,

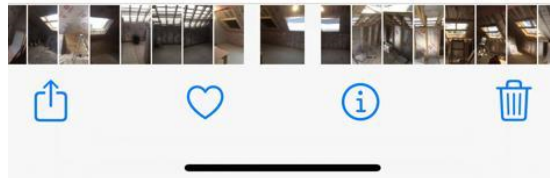

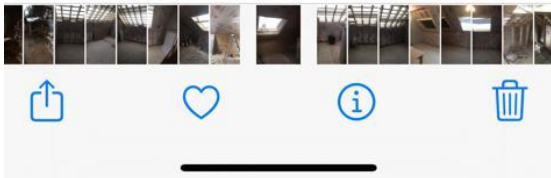

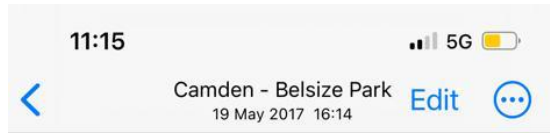

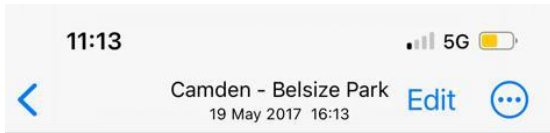

Hope you are well and write in response to your email below and to supply the additional information requested in relation to the external works to the building.

I am advised by our Client, Construction work commenced in 2015 and the Client's Building Contractor had to make certain minor adjustments to the roof construction to allow for the correct floor to ceiling heights in the loft area; as per the new configuration of floorplans it was necessary to add a couple of extra skylights in appropriate positions to provide better light.

Please see photo below dated 15/03/17 - this photo indicates the later/end stages of external construction.

In May 2017 external construction and roof were completed - See photos below dated 19/05/2017.

The internal works were completed and the flats occupied from 01/03/2018 as confirmed in the ASTs already sent to you.

I trust you now have all the information requested but if there are any final queries please let me know.

Thank you.
Regards
