

To Camden Planning Department

I would like to formally object to the following planning application: 2023/3074/P

After being refused a Certificate of Lawfulness, the owner appears to be attempting to circumvent longstanding planning regulations. Submitting the same plans individually rather than collectively does not alter the content of the application. Please regard the applications as a collective, rather than individually.

If a conservation area is to be truly respected, it ought to indeed be protected. I therefore urge you to stick to your original decision, to reject these applications. Deception should not be rewarded with your blessing.

The fact that building works continue, despite the aforementioned refusal, is demonstrative of the lack of respect this owner has for the area.

The noise pollution is unbearable. The impact on the biodiversity is profound.

The owner should not have the right to radically transform the once beautiful space we all reside within.
