### RE: 67 Whitfield Street Outdoor Seating Noise Impact Assessment – Addendum

Camden's planning officer have raised a comment, that our Outdoor Seating Noise Impact Assessment referenced as 29795/PTM1 Rev02, issued on 31 July 2023, takes an average of the background noise level across the opening hours. They have said that this doesn't identify the noise impact during the more sensitive hours.

Considering the aforementioned comment, we have conducted a desktop assessment to analyse our environmental noise survey data to determine a noise limit considering the hours between 18:00 and 22:00 as suggested by the planning officer.

The following histograms show the occurrence of each sound level ( $L_{90}$ ) as a percentage for the hours between 18:00 and 22:00.

As shown in above histogram, our analysis has derived a noise emission limit of 54 dB  $L_{Aeq}$ , 1dB higher than the full daytime hours (07:00 – 23:00 hours) considered in the previously issued

memorandum and therefore the proposal is predicted to be less impactful during this (more sensitive) time period.

The proposed restaurant outdoor seating area, in conjunction with the proposed Noise Management Plan, should therefore be acceptable in terms of noise.

Please note that this memorandum should be read in conjunction with our Outdoor Seating Noise Impact Assessment referenced as 29795/PTM1 Rev02, issued on 31 July 2023.

Yours sincerely

Kyungmin Kim
